

electric Graph™

Nuclear Powered Visualization

electric Graph is a quantum leap in data visualization. It delivers rapid answers, new perspectives, and interactive solutions to all of your data visualization needs. Read on to learn more about the next generation of data discovery.

A Picture is Worth a Thousand Numbers

You'll find a chart type for all data sets, with enhancements that include multi-measure, overlay, stacked, sub group and 3-axis visualizations. Plus, electric Graph delivers new ground breaking visual metaphors that provide dynamic insights into old problems.

Dynamic Drill-Down

An effective chart immediately brings your attention to specific elements of a data set. Now, you need to get back to the details. By allowing drill-down from any chart or element within, electric Graph allows you to continue your knowledge exploration.

Real-time 3-D Rendering/Rotation

Bring your data to life with 3-D rotation. You can easily grab and manipulate charts in real time to present your data in its most enlightening perspective. Finally, 3-D that has value.

Smart Palettes™

Go beyond defaults and easily create your own custom color palettes. And, with SmartPalettes your color palettes can be linked to data for easy recognition and consistent presentation.

Auto-Titles/Labeling

As you drill down and interact with charts, electric Graph automatically re-titles and labels your visualization. And, of course you can always create custom titles.

User Annotations

Collaborate on dashboards, reports and visualizations with StickNotes™ to remind yourself and inform others. Annotation made easy.

Format & Print

Add the finishing touches to your charts with your own labels, headers, footers and more. Complete layout control is made easy with the electric Graph's drag and drop editor.
