

AnswerBridge™

Extending eThORITY® Dash™ functionality into the future.

eThORITY® AnswerBridge™ interface

eThORITY® Dash™ interface

Predictive Analytics

AnswerBridge™

Insert wizard-based Predictive Panel into dashboards, enabling viewers to customize predictive analytics for your specific needs. Your very own crystal ball.

Interactive What-If Scenarios

Utilize what-if scenarios to affect the data presented in the dashboard in real-time.

User-Obvious Modeling

Drag and drop features and wizard-based models extend predictive analytics beyond the statisticians to the business users. Use pre-built models or build your own using the AnswerBridge model creation wizard. Prove your model by comparing model results side-by-side to empirical values.

Integration

Portal Integration

Edit your dashboards in real-time within your portal environment, making it fast and easy to get the answers you need-when you need them.

Drill-Down Capability

With a fully integrated application, users can access a complete view of your data, yet with the ability to drill down to transaction level detail for greater discovery and insight.

Dashboarding

Dynamic Interface

Go from spectator to participant. The eThORITY® Dash™ user-obvious GUI delivers an interactive experience with innovative visualizations that make it easy for users of all skill levels to get involved.

Animated Dashboards

Briefing mode allows users to design multiple layouts and create a presentation with your dashboard. Bring Dash elements to life and share them with your stakeholders.

Metric Alerts

Automated, customizable alert system can provide both static thresholds and formula based alert systems. From the front line workers to the business analyst, you'll never miss critical notifications again.

Distribution

Integrated Security

Create one dashboard for a wide audience and the Dash security automatically restricts what data users can see, eliminating compliance worries.
