

Change the conversation.

With critical pre-award budget and post-award financial information at your fingertips, you finally have power to change the conversation with researchers and sponsors alike.

Immediate insight

Built-in wizards

Subject compliance

Data Reporting and Analysis

Consolidate all clinical and financial data in a secure and compliant analysis environment.

Ease of Accessibility

Effortlessly pull data from a number of sources to give administrators the tools and resources needed to effectively manage trials—using only one application. And, eThORITY adapts to your business processes, not the other way around.

Effort Reporting

Streamline your effort allocation for increased accuracy, accountability and compliance with federal regulations. Instantly create and distribute effort reports to government agencies for hassle-free transparency.

Protocol Management

Speed the trial creation process with visit matrices and protocol wizards by allowing departments and users to create specialized workgroups with core item lists. Access to a common charge master for each billing system reduces inconsistency in trial charges and serves as a central knowledge base.

Subject Management

Track study subjects anonymously or by demographics as each subject can have independent identifiers for each resource system. When subject names are provided, all access to subject records by any application user is recorded to comply with HIPAA requirements.

Automated Milestone Invoicing

eThORITY Clinical Trials delivers a robust and adaptive milestone module that automates the invoicing process based on business rules that you define. Know your current financial position without ever having to pick up a phone.

Let's talk financials, too.

Break-even analysis

Subject	Income	Per Subj
1	0	0
2	100,000	50,000
3	200,000	100,000
4	300,000	150,000
5	400,000	200,000
6	500,000	250,000
7	600,000	300,000
8	700,000	350,000
9	800,000	400,000
10	900,000	450,000
11	1,000,000	500,000
12	1,100,000	550,000
13	1,200,000	600,000
14	1,300,000	650,000
15	1,400,000	700,000
16	1,500,000	750,000
17	1,600,000	800,000
18	1,700,000	850,000
19	1,800,000	900,000

Billing compliance

Budgeting

Maintain accurate clinical trial budgeting through consistent application of budget models, fee schedules, negotiated rate management, automated overhead calculation, electronic routing/approval, and profit analysis.

Funds Control

Seamless integration with eThORITY Financials enables effective clinical trial funds control to be implemented. This prevents the deficit spending that can easily occur with clinical trials, due to their fiscally dynamic nature.

Fee Source Management

Manage what you want, the way you want. eThORITY Clinical Trials has the capacity to track the costs of all services, items, tests, procedures and more for any given trial. Conveniently manage and synchronize independent fee schedules with outside billing systems. Users even have the power to create negotiated rate schedules for trials and restrict minimum fees to prevent under-budgeting.

Financial Reconciliation

Get a complete understanding of your expenses. With eThORITY Clinical Trials, you will be able to quickly see what expenses have hit your research accounts. And, eThORITY Clinical Trials provides functionality to adjust and track for errors that occur in the process of managing trials.

Billing Compliance

Stop billing problems in their tracks. eThORITY Clinical Trials can play an important role in the management of your compliance audits. With its ability to integrate and reconcile with most billing systems, eThORITY can help you identify and resolve conflicts before they become a problem.
